

SE Classic Chair

SE Classic Chairs meet and exceed the EN1729 standards with an additional focus on the correct lower back support to give correct posture. This focus on pupil comfort aids learning by increasing concentration levels also improving long term health.

For many years both education establishments and furniture manufacturers have been looking for the perfect solution, a chair that fits in with the new image conveyed in Academy and BSF build projects, a chair that gives perfect postural support for our children's backs, a chair that is built to last by a manufacturer that has always made education furniture and moreover a chair that will achieve all of these things but still be affordable for all, that chair is the new SE Classic Chair.
