

# ASSEMBLY INSTRUCTIONS

## 1. TABLE BRACKETS.

In each side panel there are pre drilled holes to attach the Table Bracket to the side panels. The Pre drilled holes can be located by four staples in a square around the hole in the fabric. Use the bolts provided to attach the bracket to the side panel. Repeat for both Side Panels.

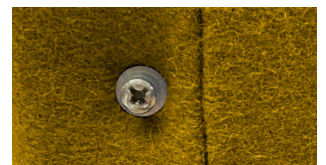

## 2. SIDE & BACK PANELS.

On the back panel there are 2 screws each side at the top and bottom. The side panel have brackets which can be located on the edge of the panel. Align the side panel with the back panel and place the screw in the larger hole of the bracket. These should slide together firmly and repeat for the rest of the panels.

**NB.** Brackets & Screws might can be tight for transportation reasons,  
They can be loosened slightly to allow the panels to slot together.

Bracket | Side Panel

Screw | Back Panel

## 3. SECURING TABLE.

Once the Back and Side Panels have been firmly connected the table can be placed onto the table brackets and secured to the brackets by placing screws in the underneath of the table with the holes allocated.

## 4. POWER & DATA.

If you selected Power or Data Unit.

The Unit will be built into the back screen, the power supply cable will come as 2 parts.

Lift the connection lock to plug together and push the clip back down to secure connection.
